

# Embedding Content (ie: YouTube video or Google Map)

## What is Embedding?

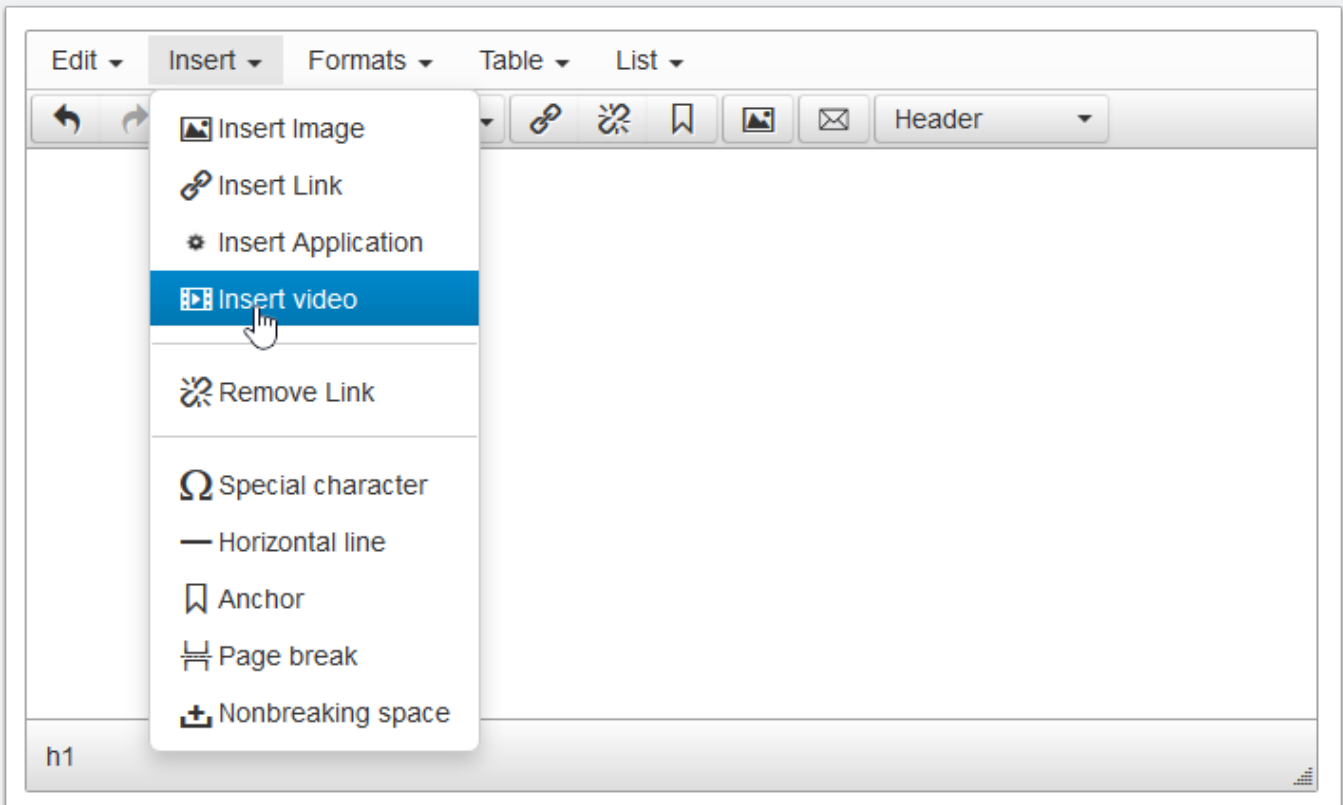

First, let's clarify what Embedding means. Several sites now give you the option of obtaining an Embed Code, for the purpose of embedding certain outside content into your website. Examples of such sites are YouTube and GoogleMaps.

# Embedding Content (ie: YouTube video or Google Map)

## How to Embed

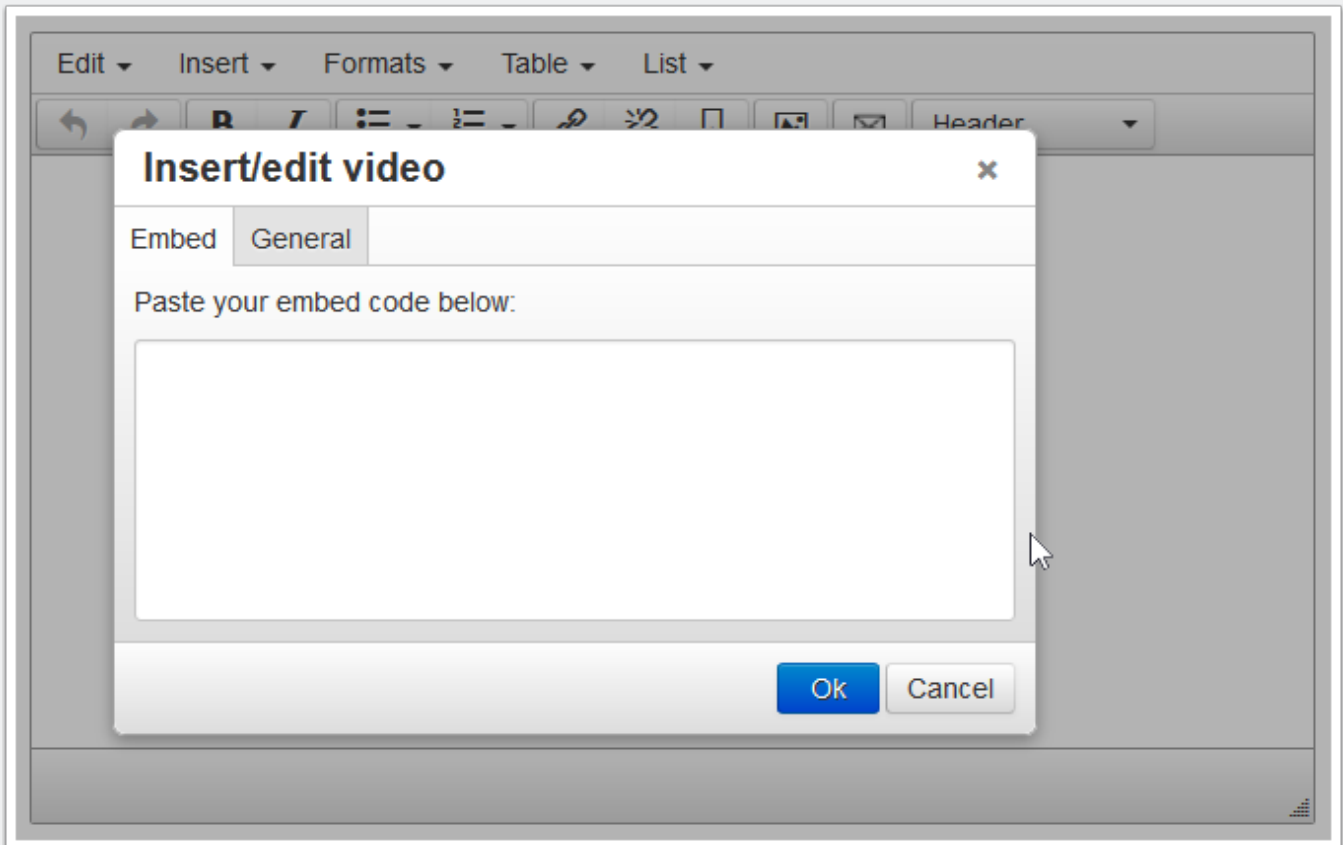

So to embed such content into your site, first place the cursor where you would like the content located, and then click on Insert > Insert Video.

# Embedding Content (ie: YouTube video or Google Map)

## How to Embed

In this new window, use the Control + V paste function to paste the code snippet you've obtained from the source site and click Ok.

# Embedding Content (ie: YouTube video or Google Map)

## Paste Embed Code

For this tutorial, we'll paste a snippet obtained from YouTube. Once pasted, press Ok and finish editing the page.
