

Problem with pasting from outside source

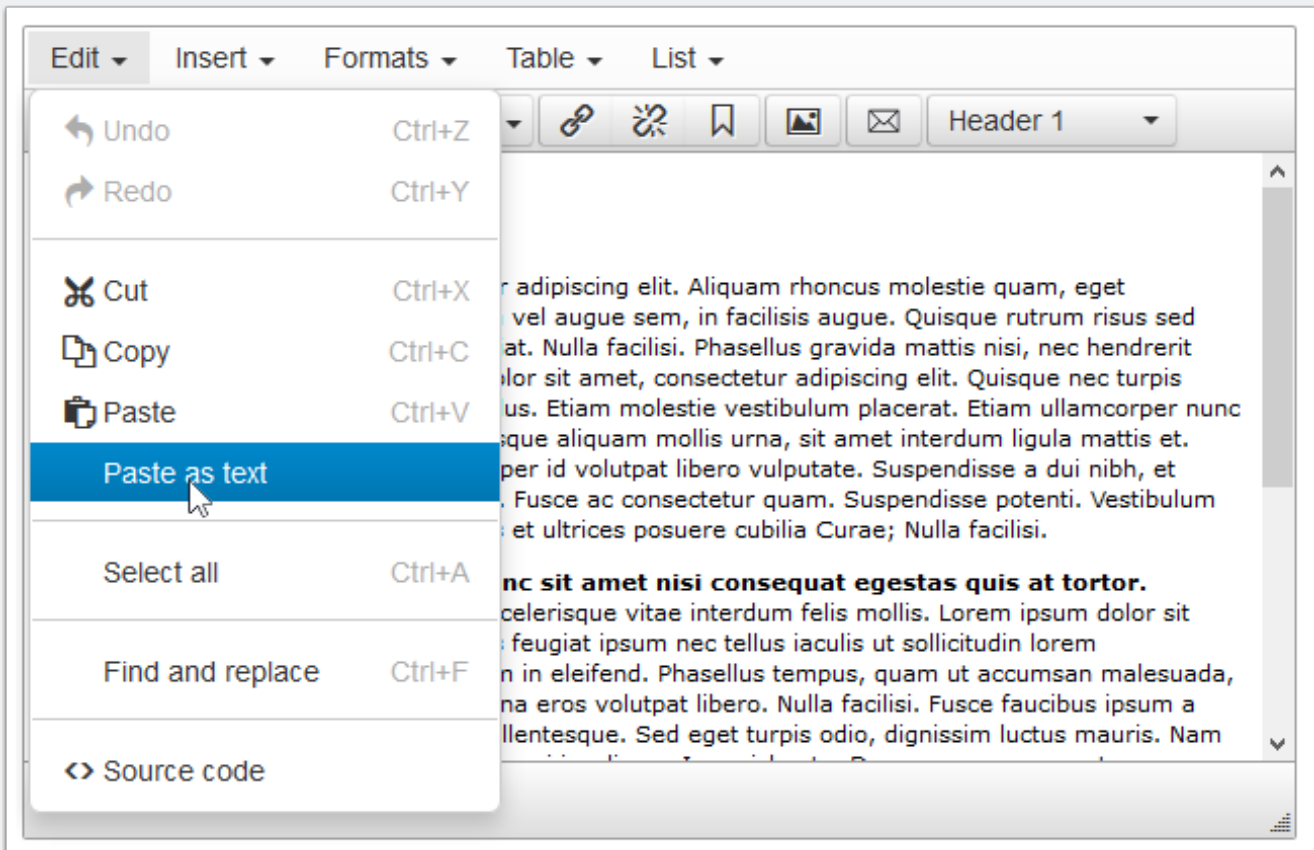

A lot of our clients like to paste content directly from Microsoft Word, or some other outside source. Unfortunately this can cause some issues because a lot of the time, formatting from that outside source will also be pasted onto the page, and the page might end up looking different than your other pages.

Pasting from Outside Source (ie: Word)

Paste as text

To get around this, click on Edit > Paste as text.

Paste as text

Once you click Ok on this message, you will now be able to copy and paste directly from any outside source. This will stay on until you Submit the page, or click on Edit > Paste as text again.
