

# Upgrade Announcement

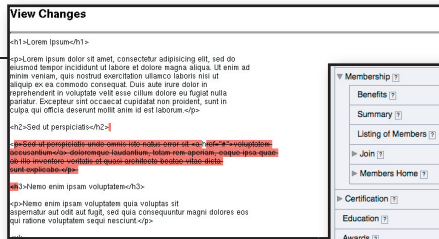

October  
2009

## ExSite 3.6.2 Features

The following outlines new features and modules for the Exware Content Management System. Not all features and modules will be applicable for all client sites. If you have questions about this announcement or how your site can incorporate these new features, please call or email us.

### CONTENT MANAGEMENT

Not sure what edits were made between two versions of a page on your website? Now with ExSite 3.6.2 you can now easily compare the changes made between two dates. We've also added a collapsible menu system to My Website.

Compare content edits between two dates

Collapsible menu in My Website

### E-ZINES

Once again, we've improved our popular E-Zine module. Here is a list of the additions:

- Addition of Read/Unread flags to the forum
- Members can now receive emails whenever someone responds to his/her post.

### MEMBERSHIP

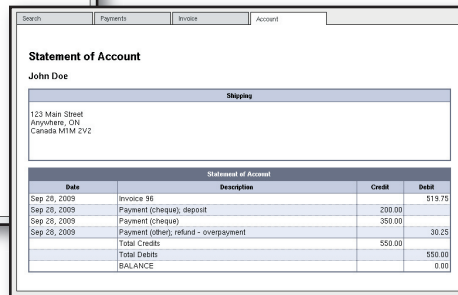

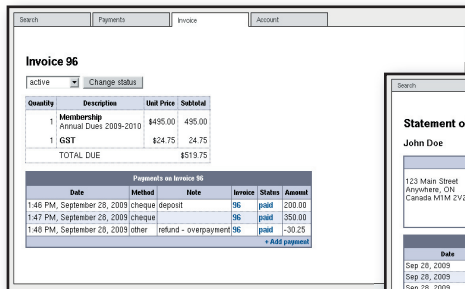

We've greatly improved the networking tools for our Membership module by enabling members to view other members profiles (including a summary of their postings) and adding a Private Messaging tool. Other additions include:

- Weekly email admin reports on Pending members
- Allow members to renew before their membership is set to expire.

### E-COMMERCE

A new Finance framework has been implemented that integrates online and offline payment processing. It also supports account management (ongoing or partial

payments) and integrates your various payment requirements into a single shopping cart. We've also thrown in more secure payment processing and built-in tax and S&H calculators.

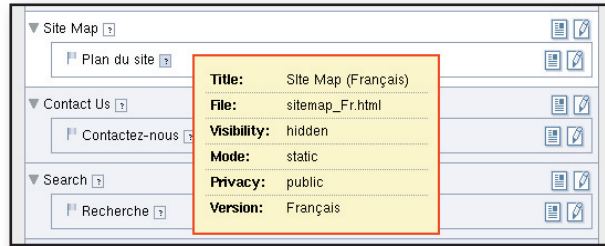

### SECURITY

Your website is now more secure than ever. We've introduced automatic testing of passwords to ensure your administrators or users do not intentionally switch to weak passwords that could compromise your website's security.

Also, we've added new anti-robot web form security features and made it possible for different admin levels to see specific modules on the webtop.

## INTERNATIONALIZATION (MULTILINGUAL WEBSITES)

With every new version of ExSite we improve on our Internationalization and this version is no exception. We've upgraded all of our tools and have added multilingual support for all system messages and prompts.

## EVENT MANAGER

For Supported Clients using our Event Manager, the following new features can now be added to your system:

- New merge codes for the Email Module
- Fees can be set-up as Member-only
- Activities can be set-up for specific Fee Types
- A Registration End Date has been added

## SEATING MANAGER

We're introducing an **optional add-on for the Event Manager**. Our new Seating Module allows you to automatically set-up table/seating plans for an event.

## TO-DO

We're introducing the To-Do Module, which allows you to:

- View pages that have been edited but not published
- View a list of Pending members
- View a list of Zine postings that need to be moderated
- View a list of System Messages awaiting translation

## SYSTEM

A couple of useful features have been added to the ExSite system:

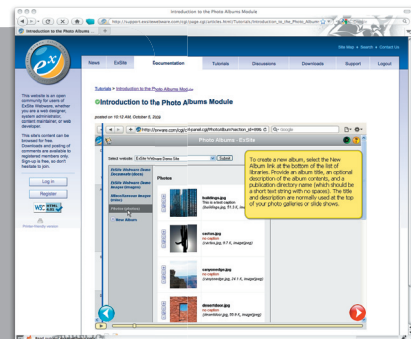

- Trash can now automatically empty itself, preventing clutter and unnecessary disk usage
- We've added a Backup function to let you download the content of your website (including any files and databases) to your desktop.

## ONLINE SUPPORT SITE

Exware Solutions has unveiled a new component to our Online support site. We've introduced a comprehensive list of short tutorials to visually guide you through some of our most common tasks. These include:

- How to add an Event Calendar,
- How to add & configure pages
- How to add a Photo Gallery to your site **and many more...**
